Malolos City, Bulacan, 3000

Student in University of Santo Tomas currently studying Information Systems with specialization in Business Analytics, skilled in SQL, Python, and data analysis, with credentials from IBM and Databricks. Experienced in building data-driven dashboards and web applications, and in translating business needs into practical solutions. Passionate about continuous learning and eager to learn from industry professionals.

Projects

Goat2Go: Tatuns Restaurant's Management System Aug 2025 - May 2026
Developer
- Architected and deployed a full-stack management system using Vite, React, and Supabase to streamline restaurant operations and data persistence.
- Developed a centralized management dashboard that provides real-time business analytics to monitor key performance indicators and operational efficiency.

BayaniHub Mar 2026 - May 2026
Developer
- Developed scalable backend services and API integrations using Node.js and Supabase to support core platform functionalities.
- Refined frontend UI/UX components with React and TypeScript, improving responsive design and ensuring cross-browser compatibility.

Damayan Feb 2026 - Mar 2026
Chapter Lead
- Led the agile development lifecycle during Sprint 0 and Sprint 1, coordinating task distribution and milestone tracking.
- Architected the system's Call Flow Diagram, mapping complex logic paths and user interaction sequences to guide the development phase.

Gambz Laundromat Oct 2025 - Dec 2025
Lead Developer
- Led the end-to-end development of a full-stack laundromat management system utilizing Vue.js, Node.js, and MySQL.
- Implemented comprehensive business modules, including transaction processing, customer management, and real-time service tracking.

Demand Forecasting and Prescriptive Inventory Management Dashboard for the USTore Jan 2026 - Nov 2026
Developer
- Developed a demand forecasting and prescriptive inventory management system for the University of Santo Tomas Store (USTore) using Python, Prophet, PostgreSQL, and Power BI.
- Built a digital tallying interface to replace paper-based sales records, and implemented FSN analysis, demand forecasting, and Reorder Point/EOQ modules that power real-time stock alerts and automated monthly sales reports.

Education Level

University of Santo Tomas Aug 2023 - Jun 2027 (Expected)
Bachelor of Information Systems
- Consistent Dean's Lister for 6 Terms

Holy Spirit Academy of Malolos Aug 2021 - Apr 2023
Senior High School, STEM
- With Honors
- Best in Capstone Award

Organisational Experience

Thomasian Gaming Society (TGS) Oct 2023 - Apr 2025
Marshal
- Assisted and managed tournament brackets and seeding for both online and offline events.
- Moderated competitive lobbies and Discord servers, overseeing match communication and providing technical support to participants during events.

Skills, Achievements & Other Experience

- **Soft Skills**: Problem Solving, Critical Thinking, Adaptability, Teamwork, Communication, Time Management, High Typing Speed (100-120 WPM)
- **Hard Skills**: Data Analysis, Business Analysis, Frontend Development & UI/UX Design, Backend Development
- **Programming Languages**: Python, Java, TypeScript, PHP, and React
- **Tools & Platforms**: Git/GitHub, Figma, Canva, MySQL, Jira, Miro
- **Certifications**: Introduction to Data Analytics - IBM, SQL Intermediate - Sololearn, Introduction to SQL - Sololearn, AI/BI for Data Analysts - Databricks, SQL Analytics on Databricks - Databricks, IT for Business Success - HP Life
